

The Evanston Reach Task Force is pleased to announce
the Evanston Reach website at

www.evanstonreach.com

This website has been an community-wide project developed through collaboration and integration of resources. We hope that our community will utilize the website to gain insight regarding community health, whether it is to utilize the event calendar of upcoming events, or links to other prevention efforts in Uinta County. We offer information varying from a community resource guide to city and county resources, as well as schools, restaurants, an Evanston map and weather, opportunities to advertise our local prevention efforts and a link to our partners.

Please visit and share your comments, we are a work in progress and look forward to adding additional information and links. For more information, please contact, Tera Lawlar at info@evanstonreach.com
